

**Slav-Invest** is a group of companies with over 16-year experience in Project Management, designing, engineering, general contracting and turn-key construction. This group includes such companies as Slav-Invest Engineering and Slav-Invest Consulting and Project Management.

**Our goal** is provision of professional services and performance of timely and qualitative works in order to ensure profitability of any project.

To date the company assets contain over 100 accomplished projects in 11 cities of Ukraine, starting with turn-key construction of 39 McDonald's restaurants to designing and management of large investment projects in real estate, including industrial facilities.

**Milan Pajevic** is the owner and the chairman of directors' board.

### **Fields of activity:**

**Designing** and further approval with the executive authorities for facilities with various function - office buildings, shopping malls, residential buildings, hotel complexes, restaurants, cafes, public utility facilities, etc.

**Construction** – general contract and sub-contract works for facilities with various functions.

**Engineering** – designing, installation, balancing and commissioning, after-sales service and warranty repair of heat supply systems, water supply and purifying systems, sewage system, ventilation and conditioning systems.

**Interior design** – development of individual interior design projects for residential apartments, cafes and restaurants, office premises and commercial spaces.

Our projects have succeeded due to the team of professionals consisting of foreign and Ukrainian experts with extensive construction experience in different countries (Germany, Czech, Austria, Iraq, Iran, Sudan, Russia and Ukraine). For our projects we engage leading foreign and local experts of different qualification.

Slav-Invest is a member of the Ukrainian Building Association (UBA), the European Business Association (EBA), American Chamber of Commerce (ACC), and corporation Ukrainian Building Materials (UBM).

# WORK EXPERIENCE

## 1. Design, construction and engineering
